**MICROFILMED**

## *ECONOMIC INDICATORS*

Prepared by

The Office of Economic Research

24 September 1975

*(12)*

### Foreword

1. The *Economic Indicators* provide up-to-date information on changes in the domestic and external economic activities of the major non-Communist developed countries. To the extent possible, the *Economic Indicators* are updated from press ticker and Embassy reporting, so that the results are made available to the reader weeks -- or sometimes months -- before receipt of official statistical publications. US data are provided by US government agencies.

2. Several changes were instituted in the 10 September issue of *Economic Indicators*. The vertical scaling of most graphics has been expanded to improve clarity. The Foreign Trade graphic now shows *value* of exports and imports in US dollars instead of the index numbers formerly used. A new Current Account table expands the coverage of balance-of-payments information. Seasonal adjustment factors used by OER have been recalculated on the basis of data from January 1969 to mid-1975 using Census Method II, X-11 Variant. The French unemployment rate series has been revised on the basis of new information relating to the coverage of French unemployment data.

3. Source notes for the *Economic Indicators* will be published quarterly. The most recent date of publication is 10 September 1975. Comments and queries regarding the *Economic Indicators* are welcomed. They may be directed to [REDACTED] of the Office of Economic Research, IDS Code 143, Extension 5911, or Area Code 703, 351-5911.

STATINTL

# INDUSTRIAL PRODUCTION

INDEX: 1970=100, seasonally adjusted

# UNEMPLOYMENT

PERCENT OF LABOR FORCE

NOTE: Data are seasonally adjusted. Unemployment rates for France are estimated. The rates shown for Japan, Italy, and Canada are roughly comparable to US rates. The rates for France and the United Kingdom should be increased by about 30% and 15%, respectively, and those for West Germany decreased by 20% to be roughly comparable with US rates.
